

2022 Japan International Welding Show

Think Future, Act Now!

Venue

Tokyo Big sight

Data

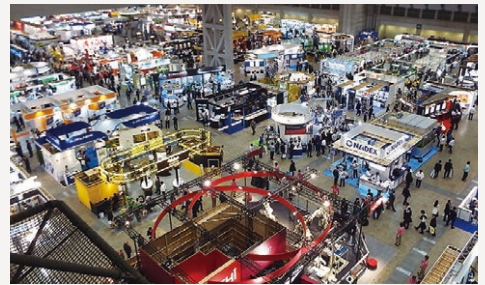

From July 13 to 16, 2022

Organizer : The Japan Welding Engineering Society, Sanpo Publications, Inc.

Cutting-edge Technologies will be assembled together

Hands on experience with the latest welders, laser machines,
3D printers and robots

Learn more about welding, the core structure

Various Special Events

Summer Festival on Welding

- Hands-on Workshop corner on Welding
Stained Glass Making (Cooperated by Osaka University)
- DIY Challenge with welding!
Workshop on Welding
- "Monument of light" created by laser beam

"Welding Art Exhibition" by high school students

The 12th Kanto-Koshinetsu Regional High School Welding Competition

Parallel Event "Hokuriku Regional High School Welding Competition"

The welding industry's commitment to achieve carbon neutrality

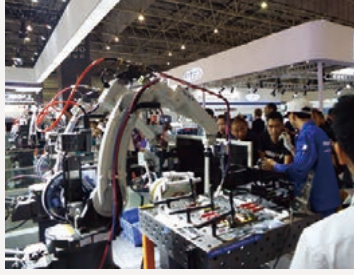

- "Energy Revolution in Japan"
- "The manufacturing revolution through digital transformation (DX)"

* The measures to prevent the spread of COVID-19 infection at the 2022 Japan International Welding Show will be implemented according to the guidelines of the related exhibition organizers and the venue regulations, such as the Japan Exhibition Association and Tokyo Big Sight.

Field trips for high school students are planned.

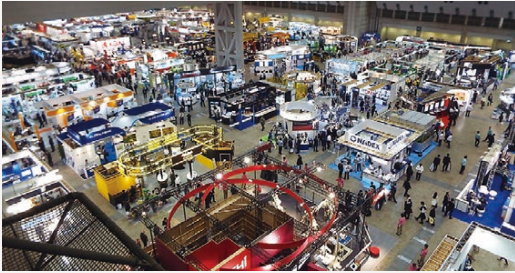

The Cutting-edge welding technologies and products

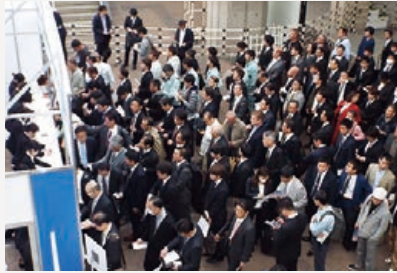

Cutting-edge welding machines and robots will be demonstrated

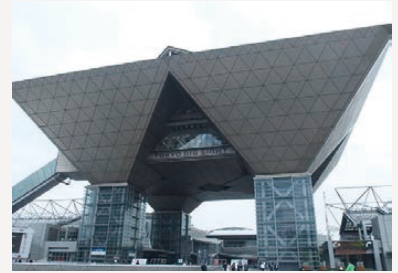

Virtual Welding Experience

The Cutting-edge welding technologies and products

Participants at the past exhibition

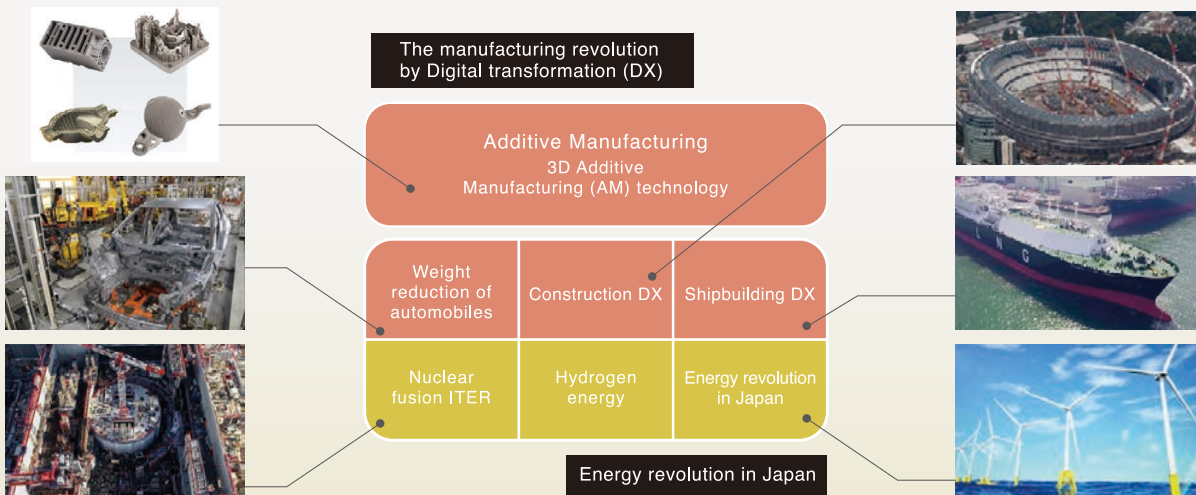

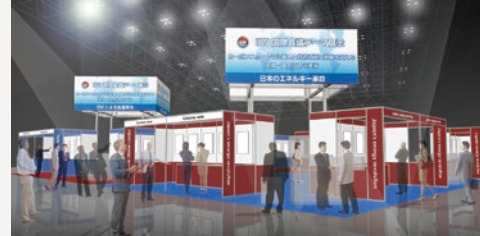

Venue (Tokyo Big Sight)

Parallel Event

The Special Collaboration with the IIW2022 International Conference on Welding and Joining

Exhibit the future of carbon neutrality all together
